SKILLS

STRENGTHS

Full-Stack Development

Comfortable across the stack, pairing responsive Vue.js and TypeScript interfaces with robust C# and .NET back-end services and APIs.

Leadership and Team Dynamics

Proven ability to lead, manage and coach team members towards project success.

End-to-End Ownership

Drives features from initial technical design through to production rollout, delivering reliably under tight deadlines.

EDUCATION

Bachelor of Interactive Digital Media (CS Major)

Queensland University of Technology
2017 Cohort

SUMMARY

Experienced Full-Stack Software Engineer with over 8 years of experience across enterprise web development and game development. Proficient in Vue.js, TypeScript, C#, and .NET. Skilled in software architecture and delivering full-stack features end-to-end, from responsive front-end interfaces to robust back-end APIs, across large, multi-repository codebases. Adept at problem-solving, technical decision-making, and collaborating within cross-functional teams, while being adaptable to new information and changing requirements. Seeking a Full-Stack Software Engineer position at a company where I can apply my software development skills to contribute to innovative solutions and effectively represent customer needs.

WORK EXPERIENCE

WiseTech Global

08/2024 - 06/2026

Full-Stack Software Engineer

- Architect and delivered full-stack features for a large-scale enterprise web platform, owning a complex workflow management module end-to-end across feature flags, back-end API endpoints, and multi-tab dialog interfaces, from initial technical design through to production rollout.
- Designed and implemented a standalone, metadata-driven security configuration for CRUD operations spanning multiple repositories, enabling teams to configure access roles directly. This was recognized by leadership for end-to-end ownership under tight deadlines.
- Build reusable, slot-based UI components for a shared design system, including a configurable, branding-aware login layout rolled out across numerous web portals.
- Created and evolved an internal multi-framework test runner adopted across the organization, extending it from a single framework to several by decoupling the runner architecture from any one testing framework. Adapted this test runner for agent usage to provide a more token efficient way to discover/run/fix related tests.

Mighty Kingdom

09/2021 - 05/2024

Senior Software Engineer

- Integral member of a dynamic development team renowned for crafting award-winning narrative games tailored for mobile devices.
- Spearhead the creation of robust game features, elevating the overall user experience through innovative programming solutions.
- Take the lead in implementing comprehensive testing strategies, including rigorous device testing, implementation of unit and end-to-end tests, and integration of data validation. These efforts ensure product reliability, ease of maintenance, and seamless user experiences.
- Employ continuous integration and continuous deployment CI/CD methodologies to streamline game production processes, ensuring efficiency and stability in our releases.

Wymac Gaming Solutions

06/2018 - 08/2021

Senior Software Engineer

- Played a pivotal role as a core game development team member, collaborating closely with game designers, artists, sound engineers, and testers to deliver high-quality games targeted for release in various casinos, pubs, and clubs.
- Led the end-to-end development process, from conceptualization to release, ensuring the successful delivery of Wymac's core games.
- Applied a diverse skill set encompassing problem-solving, mathematical analysis, and effective stakeholder engagement to drive project success.
